QSBS Benefits Expanded under One Big Beautiful Bill Act

By: Kayla Perry

In July 2025, Congress passed, and the President signed, the One Big Beautiful Bill Act (the "OBBBA"). The OBBBA includes a major overhaul of the Qualified Small Business Stock ("QSBS") rules under Internal Revenue Code Section 1202, representing the first substantial update in over a decade. The OBBBA expands the benefits applicable to QSBS acquired after July 4, 2025.

QSBS Generally

QSBS is a tax benefit that applies to eligible shareholders of certain small businesses. The QSBS tax exclusion allows eligible taxpayers to exclude a portion of the capital gains realized from the sale or exchange of QSBS from their federal taxes. To qualify as QSBS, several criteria must be met, as set forth below:

- the company must be a domestic c-corporation issuing original stock to the taxpayer;
- at and immediately after issuance, the company's aggregate gross assets must not exceed a specified threshold;
- at least 80% of the company's assets must be used in the active conduct of a qualified trade or business; and
- the shareholder must hold the stock for a minimum period before selling.

QSBS Rules Pre-OBBBA

Prior to the OBBBA, taxpayers were generally permitted to exclude from taxable income capital gains attributable to the disposition of QSBS that was held for more than 5 years. Exclusion percentages were tiered depending on the acquisition date and capped at the greater of \$10 million or 10 times the taxpayer's tax basis.

Changes under the OBBBA

The OBBBA enhances key areas of the QSBS rules to be more favorable to taxpayers by:

- shortening the holding period;
- tiering the gain exclusion based on the holding period, rather than the issuance date;
- increasing the gross asset value limitation; and
- increasing the cap on capital gains.

A side-by-side comparison of these key areas pre-OBBBA and under the OBBBA is detailed in the chart below.

Item	Pre-OBBBA	OBBBA
Holding period	> 5 years	> 3 years
Tiered gain exclusion		
100%	stock acquired after September 27, 2010	stock held for 5 or more years
75%	stock acquired after February 17, 2009 and on or before September 27, 2010	stock held for 4 years
50%	stock acquired on or before February 17, 2009	stock held for 3 years
Cap on gain exclusion	greater of \$10 million (\$5 million for married taxpayers filing separately) or 10 times the taxpayer's tax basis in the QSBS	greater of \$15 million (\$7.5 million for married taxpayers filing separately), (inflation adjustments begin 2027), or 10 times the taxpayer's tax basis in the QSBS
Gross assets limit	\$50 million	\$75 million (inflation adjustments begin 2027)

Practical Impact of the QSBS Changes under the OBBBA

The OBBBA makes QSBS more flexible, more generous, and more widely applicable, **but only for stock issued after July 4, 2025**. For founders, investors and employees this means:

- earlier liquidity options: with partial exclusions at 3 and 4 years, earlier exits or secondary sales are more attractive;
- higher excluded gains: the increased cap helps high-growth exits reach greater tax-free profits; and
- qualification of more companies: with an increased gross asset limit, the pool of eligible businesses has been expanded.

Prior shareholders benefit only from the legacy rules if they acquire new stock.
